Docket Position: Against

To Whom It May Concern,

Some of TEP's rate change proposals are anti-solar e.g. reduce net metering, demand charges etc. Please do not approve any proposal that would dis-incentivize businesses or individuals to install solar electric equipment. Arizona should be the solar capital of the country. We are experiencing a global warming crisis and all proposed rate change approvals should support the use of solar energy.

Subject: Rooftop Solar use in Arizona

AZ. Corporation Commission members-

We're residents of Armory Park del Sol on east side of downtown Tucson. Our neighborhood of 90+ homes was built with not only Solar Hot water heaters, but with photo-voltaic Solar panels to supplement the electricity we buy from TEP. In our time of Global Warming and Green Energy initiatives it seems short sighted and selfish for Tucson Electric Power to be asking you to reduce and eliminate the incentives for homeowner solar systems. And to undermine a clean and cost effective form of energy.

Please continue to support the use of Solar use by individual homeowners as well as businesses by rejecting TEP's appeal. Thank you for your consideration.

Bruce & Sandy Tunze

Subject: solar issue

TEP's attempt to reduce the value of solar energy in homes is totally asinine. How can any city allow an electricity company to try and discourage exactly what is needed by every city and every country in the world today. I hope you will not give way to TEP, which needs to think of a better way to provide for the future.

Subject: Tucson values rooftop solar

Dear Corporation Commission members,

I live in Tucson and read about upcoming regulations to be reviewed by the Commission in our recent newspaper.

I am against the proposed changes requested by Tucson Electric Power. I am against their doubling the monthly service charge - that is a very large increase to go from \$10 to \$20. Certainly my salary has not doubled in the recent past. Please do not approve this.

Their second request is to undercut net metering by lowering the compensation to buy clean-energy back and to eliminate monthly rollovers. Rooftop solar makes it less likely that the power companies will need to build additional plants and infrastructure and makes it easier for them to meet EPA regulations. Rooftop solar benefits all customers and the environment. The argument that rooftop solar is being paid for by other customers is false and a sneaky plan to turn customers against each other. Please do not approve this.

And finally I think they're request for a "demand charge" on future solar customers is also misguided. Time-of-use rates would be more fair. Please, also do not approve this.

Thanks for your consideration. Arizona is a great place for rooftop solar and our public policies should reflect that. It's good for customers and it's good for the environment.

Nature Of Opinion

Docket Number: E-01933A-15-0322 **Docket Position:** Against

David: I am against the TEP proposal for rate increases. These increases will be difficult to handle for poor people and for those on fixed income. The proposed adjustments to customers using solar are not in the best interest of the environment and would discourage people investing in this important energy alternative. The resolution passed by Tucson's mayor and council on July 6, 2016, addresses significant concerns with the proposed increase. I am completely in agreement with their positions set forth in that resolution.

Ann: I am against the TEP proposal for rate increases. The proposed adjustments to customers using solar would discourage people investing in this important energy alternative. I am in agreement with the resolution passed by Tucson's mayor and city council on July 6, 2016.
